

NAYO

NAYO / CONCEPT 01

Bayt Al Sidr

A private home. A warm
welcome.

FAMILY VILLA | RIYADH

120 m² / 2026

A NAYO concept project

nayointeriors.com

The project brief

A private home. A warm welcome.

120

m² proposed study area

3 rooms + entry & circulation

The assumed brief is a family home that welcomes guests generously without exposing the family zone from the entrance. The proposed 120 m² study covers the majlis, living, dining, entrance and circulation; it is not the full villa area.

01

Privacy before decoration

An offset arrival and walnut fin screen soften sightlines from the guest route into the family living space.

02

Materials that connect

Stone, walnut and linen recur in different proportions, giving each room a distinct role within one coherent story.

03

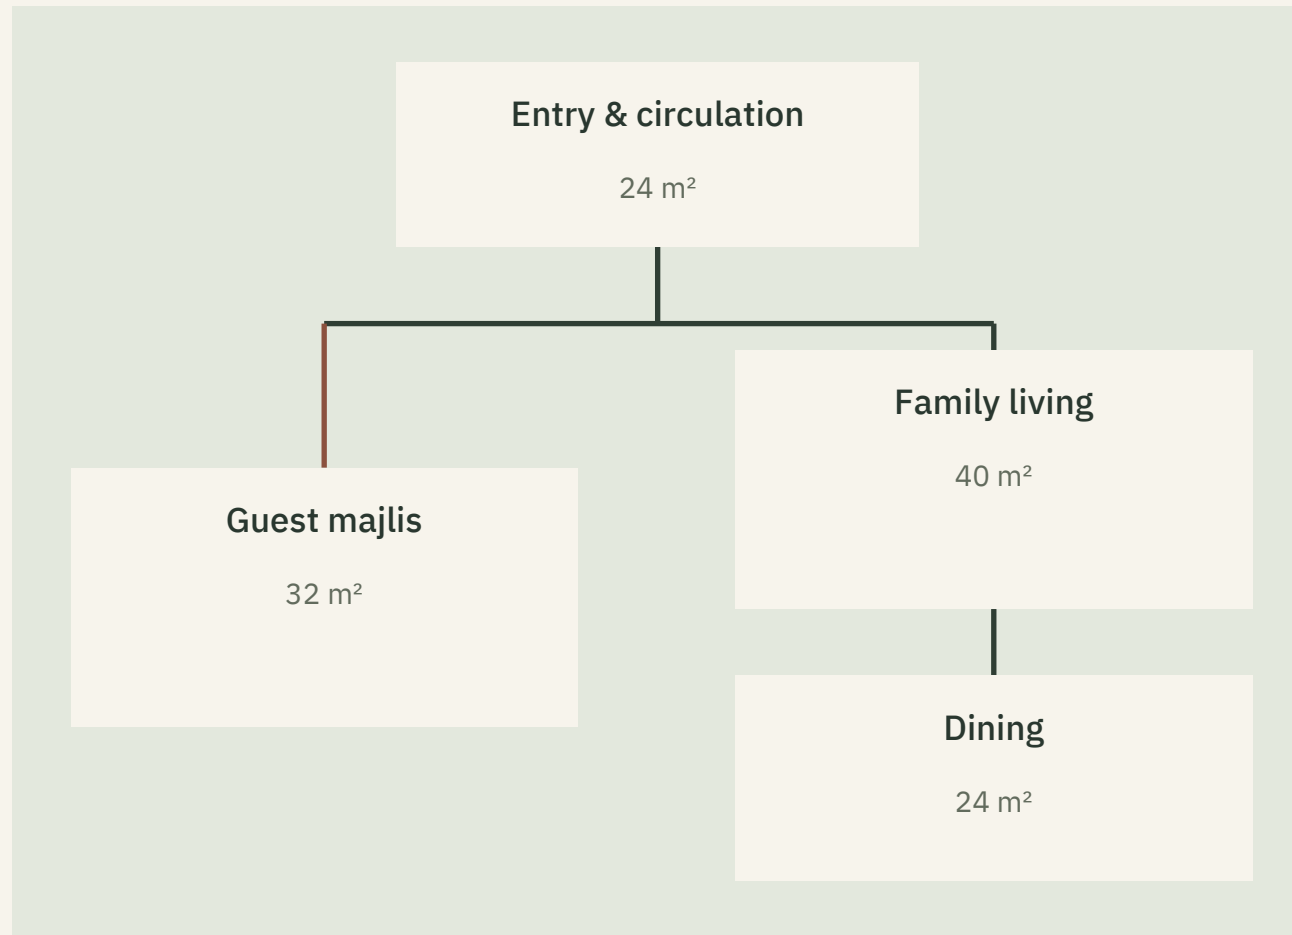

Light that follows the day

Sheer curtains soften daylight, ambient lighting supports the evening, and a focused pendant anchors the dining table.

Location and areas are study assumptions, not client-project data.

Space before furniture

Proposed relationships that balance family privacy and hospitality.

Relationship diagram only - not an architectural or scaled plan.

From public to private

Guests reach the majlis from the entry, while the family route continues toward living and dining. A timber screen softens direct views without fully enclosing the light.

These relationships must be reviewed against the actual measured site.

Family living

A place to come home to.

AI-generated concept visualization

01 / 40 m²

A low olive sofa and two oatmeal lounge chairs gather around a stone table. A floating walnut console combines storage with the television, while timber fins define the threshold without fully closing the room.

Olive linen and ivory boucle

Soft-edged travertine coffee table

Layered curtains for light control

Guest majlis

An effortless welcome.

AI-generated concept visualization

02 / 32 m²

Facing sofas encourage conversation, complemented by a built-in hospitality niche and warm timber backdrop. The proposed route separates guest arrival from the family zone; character comes from texture and material rather than ornament.

Facing sofas for conversation

Integrated coffee and serving niche

Walnut screen to manage sightlines

Dining room

Details that bring us together.

AI-generated concept visualization

03 / 24 m²

An oval walnut table is proposed for 8 seats, paired with upholstered chairs and a linear bronze pendant. A low sideboard balances the composition and supports serving, while dining remains visually connected to family living.

Oval table proposed for 8 seats

Linear pendant over the table axis

Low sideboard for serving

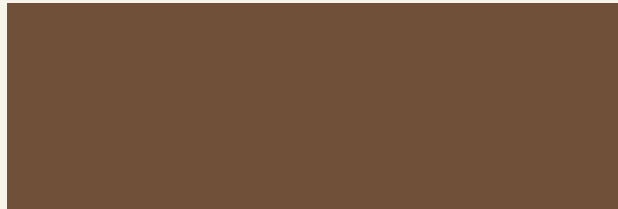

The material palette

A restrained palette, thoughtfully detailed.

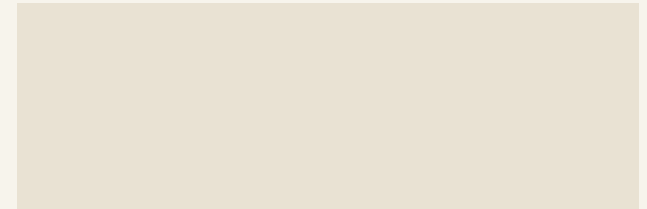

M01 Pale limestone

Matte flooring to connect the spaces

M02 Walnut

Joinery, screens and dining table

M03 Ivory limewash

A quiet textured backdrop for light

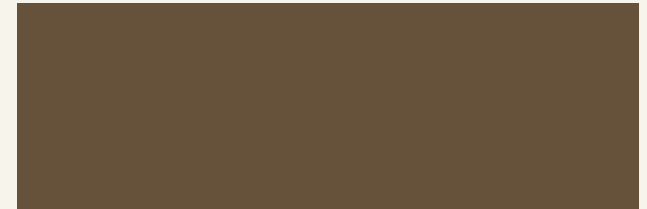

M04 Olive linen

Sofa upholstery and selected cushions

M05 Oatmeal boucle

Seating, rug and curtain direction

M06 Aged bronze

Lighting and metal accents

Colors are indicative. Final material selection depends on physical samples reviewed in the site lighting.

Light shapes the atmosphere

3 complementary layers, rather than one dominant source.

01

Filtered daylight

Sheers and a heavier fabric layer allow daylight and privacy to be adjusted through the day.

02

Ambient light

Soft concealed perimeter lighting, with separate control for each room.

03

Focused light

A linear dining pendant and local reading and hospitality accents; an initial warm-light direction of 2700–3000 K.

Initial design direction; fixture layouts and electrical loads require subsequent specialist drawings.

From concept to your project

A presentation that moves from an idea to clear decisions.

NAYO

Spaces, truly yours.

Next steps for a real project

- 01 Survey and verify the actual site
- 02 Approve furniture layouts and circulation
- 03 Review physical samples in the site lighting
- 04 Develop drawings and details after scope agreement

An in-house demonstration of NAYO's design direction. Areas and location are design assumptions. Images are AI-generated concept visualizations, not photographs of a completed project or client commission.
